

Imprint™ 4 Bite

VPS Bite Registration Material

As fast and accurate
as it can be

Imprint™ 4 Bite VPS Material offers you:

- ▶ **Good flow behaviour**
For high accuracy
- ▶ **Fast intra-oral setting**
For a faster procedure
- ▶ **High final hardness and low flexibility**
For easy cutting and trimming and accurate stone model positioning
- ▶ **Fresh material colour and scannability**
For good readability and easy access to the digital workflow
- ▶ **Cartridge delivery**
For simple and convenient mixing and dispensing

Developed for highly accurate bite registrations.

With its great flow properties and a high enough viscosity, Imprint 4 Bite material does not flow deeply into interdental areas and delivers highly accurate bite registrations. A high final hardness and low flexibility after setting allow for easy cutting and trimming as well as accurate positioning of stone models.

Saves time with a fast intra-oral setting.

Imprint 4 Bite offers a pleasant working time and a short setting time of only 60 seconds, keeping procedures moving quickly while enhancing patient comfort. And, it helps to reduce inaccuracies due to jaw movements during setting.

	Mixing and application	Setting time from start of mixing*
Imprint™ 4 Bite VPS Bite Registration Material	0:20	1:00

*The stated times are valid at 23°C/74°F. Times depend on ambient temperature.

Indications:

Universal VPS bite registration material – ideally suited for occlusal recording including optical registration of occlusal data for CAD/CAM systems.

Scan of bite registration made with Imprint™ 4 Bite VPS Material.

Get full control of your impression work.
