

**Prophy-Mate Neo**

**Perio-Mate**

# Perio-Mate

## BioFilm Eraser

Perio-Mate is used in the treatment of periodontal pockets and peri-implantitis. Avoiding injury to the soft tissues and root surfaces inside delicate periodontal pockets during cleaning procedures is crucial. The Perio-Mate's ultrafine water spray and glycine-based Perio-Mate Powder team up to gently eradicate biofilm in periodontal pockets in just 20 seconds. Thanks to years of experience in analyzing fluid dynamics gained while developing its turbine technology, NSK has devised a safe and supremely efficient spray pressure method that enables fast, precise removal of plaque biofilm from subgingival areas. The combination of the Perio-Mate's slim nozzle and fine, thin and flexible plastic nozzle tip makes procedures safer and offers optimal visibility and operability as well. The nozzle tip's shape and composition are user friendly and enable thorough and easy access to soft tissues, ensuring comfortable treatments.

### Advantages

- NSK's innovative nozzle tip
- Powder Control Ring
- Precise, flawless powder flow
- Slim nozzle design
- Maintenance
- Smooth 360° rotation

# Perio-Mate

## BioFilm Eraser

### NSK's innovative nozzle tip

NSK's new nozzle tip design incorporates semitransparent materials that promote greater visibility during procedures. Hygienic single use tips mean enhanced usability and safety.

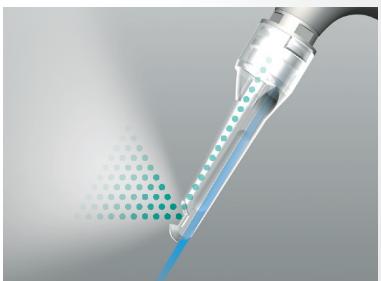

Flexible plastic nozzle tip design ensures accessibility and is gentle to the pocket

The slim nozzle tip possesses just the right degree of flexibility to pass smoothly over tooth surfaces, and can be easily inserted into tight pockets and the root surfaces of adjacent teeth without causing the patient discomfort. Quick fingertip adjustments also keep the nozzle tip properly orientated and ensure an optimal spray angle at all times.

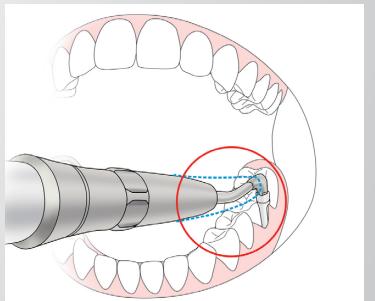

Optimized nozzle design based on fluid analysis ensures flawless powder flow in the pocket

NSK's analysis of fluid dynamics gained through years of experience in developing turbine technology fully takes into account how a clinician must maneuver in the limited space inside the pocket. The result: ideal powder spray, precise removal of subgingival plaque and biofilm, and minimal damage to soft tissues.

Slim nozzle facilitates operation in the narrow confines of the oral cavity

Even in the narrow confines of the oral cavity, Perio-Mate's slim nozzle makes it easy to cover a wide work area while ensuring high visibility and easier subgingival procedures. The long, narrow nozzle shape is designed to allow easy access to areas that require inserting the handpiece at an angle, such as between molars.

## Perio-Mate Complete System

PER-M4-P	Y1002659	Connect direct to the handpiece tubing MIDWEST
PER-B2-P	Y1002660	Connect direct to the handpiece tubing BORDEN

### Contents

- Handpiece
- Powder case
- Nozzle tip (40 pcs)
- Maintenance kit

Smooth 360-degree rotation for safe and accurate operation

The handpiece can easily be rotated using the fingertips even while performing complex operations. The nozzle tip allows easy access to difficult to reach areas, and does not adversely affect neighbouring teeth and contours.

### Powder Control Ring

The Perio-Mate's convenient Powder Control Ring makes fine-tuning powder flow simple and intuitive with quick fingertip adjustments. You can remove biofilm and address peri-implantitis even in sensitive periodontal pockets and around implants gently and efficiently. In addition to easily controlling and stopping the flow of powder in this way, you can cleanse the treatment area from biofilm uninterrupted.

### Maintenance

The nozzle with its nozzle tip, handpiece and powder chamber can be easily dismantled for cleaning and decontamination. A comprehensive tool kit including a blower nozzle makes dealing with blockages really easy.

### Perio-Mate Nozzle Tip

Hygienic disposable nozzle tips

MODEL Perio-Mate Nozzle Tip  
ORDER CODE Y1002741  
• 40 pcs per pack

### Perio-Mate Powder

Powder for subgingival treatment using air-polishing devices

MODEL Perio-Mate Powder  
ORDER CODE Y900938  
• 4 bottles packed in a box • Each bottle contains 100 g

### Clinical procedure

- Twenty seconds per tooth (five seconds per side) is ideal for removing biofilm from within the pockets.
- To be used for peri-implantitis within 5 mm of the area affected by gingivitis. (For maintenance in cases of periodontitis and peri-implantitis therapy after initial treatment is completed; for periodontal pockets up to 5 mm in depth only.)

\*Protocol cases are available on request, and can also be found on our website, [www.nsk-inc.com](http://www.nsk-inc.com).

\*Do not wash the powder case or the powder case's cap in a thermo-disinfector.

The handpiece can be washed in the thermo-disinfector. Autoclavable up to 135°C

from every corner  
Spherical granules remove residues

FLASH pearl granules are small and spherically shaped  
compared to particles of sodium bicarbonate powder.

This means more contact and better access to clean all target areas effectively. A wider working angle also provides  
greater treatment safety.

**A New Effective Cleaning System!**

The spherical shape of FLASH pearl gives a smooth finish to  
tooth surfaces compared to the effects of the sharper-edged  
particles of sodium bicarbonate. FLASH pearl leave teeth  
sparkling without damaging dental enamel.

**FLASH Pearl avoids damage**

# FLASH Pearl

Sparking Results Every Time

## Advantages

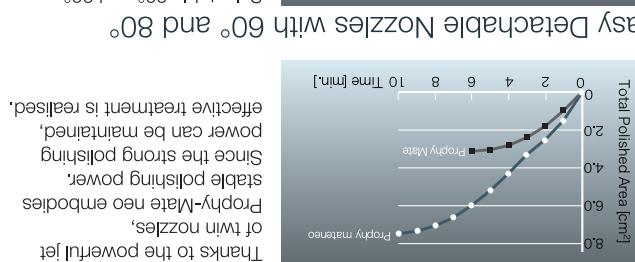

- Powerful cleaning
- Quick results
- Soft & Gentle
- Sodium-free natural taste
- Biodegradable and non-clogging
- Available for all other manufacturers' air polishing systems

**Conventional Sodium Bi-Carbonate powder**

## Prophy-Mate Neo

Enhanced Prophy-Mate neo units feature a compact powder chamber make Prophy-Mate neo comfortable to hold, while the original NSK handpiece connection swivels 360° even under strong air pressure. Effortless operation shortens time for treatment of plaque and stains. 60° and 80° nozzles are available.

- Removal of plaque and discoloration
- Etching of enamel, dentine, and porcelain prior to bonding
- Preparation for pit and fissure sealant

### Applications

- Selectable choice of 60° and 80° nozzles
- Quick connect to major turbine couplings
- Easy maintenance
- Simple to operate
- Sturdy and reliable

### Advantages
